

Institute for **Advanced Biosciences**

RESEARCH TECHNICIAN/ASSISTANT ENGINEER POSITION MOLECULAR/CELLULAR BIOLOGY

A technician/assistant engineer position funded by the H2020 program FEDER is available in the group of Bertrand HUARD. The project will aim at producing a monoclonal antibody for a personalized medicine approach against B-cell lymphoma. Applicants should possess a strong expertise in molecular/cellular biology (PCR, DNA cloning, cell culture, cell transfection), and antibody-based applications (ELISA, flow cytometry).

The successful candidate will work at the institute of advanced biosciences. She/he will have the opportunity to experience national and international academic collaborations with the Biopark d'Archamps (France), the hematology unit at the Geneva university hospital (Switzerland), and the biochemistry institute of Lausanne (Switzerland). She/he will also have to interact with French (RD Biotech, Besancon) and Swiss (Dermabiotech, Geneva) private partners.

Applicants should send a motivation letter and a CV along with the contact information for two referees.

Job location: Grenoble, France

Position type: full time.

Contract duration: 12 months, renewable.

Starting date: October 1, 2019
